

**Vit-C Plus Crystal**  
**Pure L-ascorbic acid (antioxidant + brightening)**  
**4.5g**

**ABOUT THIS PRODUCT**

Vit-C Plus offers the highest grade ultrafine Vitamin C available – pure L-ascorbic acid crystals combined with the skin lightening power of Kojic acid.

Synergie Practitioner harnesses L-ascorbic acid crystals in dry form rather than traditional water-based serums. L-ascorbic acid is unstable as an aqueous serum and will have a short period of effectiveness in solution. Often vitamin C serums change colour after a few weeks due to break down (oxidation) of the vitamin C. When using the pure L-ascorbic acid crystals in a powder form, the vitamin C is activated when a liquid component is added (such as Hydrogel or SuperSerum). This way the ingredient is always active for maximum activity on the target cells.

**BENEFITS:**

- Promotes collagen and elastin production to reduce the appearance of fine lines and regenerate ageing skin.
- Enhances tissue repair making it excellent as scar therapy.
- Antioxidant properties protect skin cells from harmful UV free radical damage. It neutralises free radicals before they can damage the skin and is the ideal partner to physical sunscreen.
- A potent anti-inflammatory recommended following clinical treatments to reduce inflammation.
- Possesses a skin lightening effect by suppressing excess melanin production.
- Enhances skin hydration.
- Assists reduction of pigmentation by inhibiting tyrosinase enzyme and therefore reduces melanin production.

**DIRECTION FOR USE:**

Use in the morning. Tap a small amount of Pure C into the palm and dissolve at a ratio of 1:4 parts crystals to serum over the face and neck.

Mix with:

- SuperSerum for ageing skin and fine lines.
- VaNish for hyperpigmentation.

**KEY INGREDIENTS**

**ACTION**

L-ascorbic acid	<ul style="list-style-type: none"><li>- The only form of Vitamin C that can be absorbed and recognized by the skin.</li><li>- Minimize fine lines, scars, and wrinkles. Vitamin C is the only antioxidant that has been proven to increase collagen synthesis.</li><li>- Neutralizes free radicals and prevents cell damage and premature aging.</li></ul>
Kojic acid	<ul style="list-style-type: none"><li>- Reduces the appearance of sun damage and pigmentation.</li><li>- Powerful antioxidant.</li><li>- Antimicrobial agent.</li><li>- Powerful skin lightener.</li></ul>

INGREDIENT : L-ASCORBIC ACID, THIOCTIC ACID (ALPHA LIPOIC), SILICA.
