

Zovil
PERFECTION Anti-Wrinkle Serum
0.5oz | 15ml

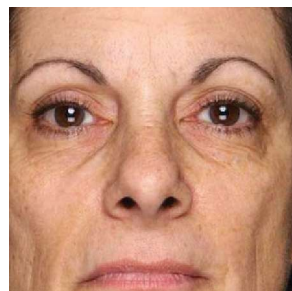

ABOUT THIS PRODUCT

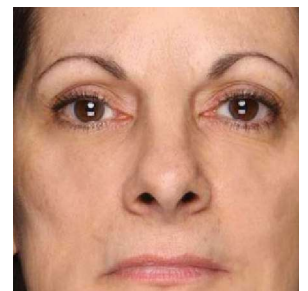

This powerful age fighter accelerates skin's natural renewal process to visibly diminish lines and wrinkles. It contains with patented & innovative ingredients - the core of ZOVIL's profound powers of transformation. Once you applied ZOVIL, your skin will feel revitalized and rejuvenated, over time, the appearance of lines, wrinkles and pores will be dramatically reduced, skin looks refined with younger-looking complexion.

BENEFITS:

- Reduce fine lines and wrinkles depth via muscle relaxation
- Prevent new wrinkles formation
- Instant filling & plumping effect
- Immediate visible results in 5 days
- Increase glow & radiance for revitalized skin

Before

After

- Aged between 35-45 years, applied twice a day a cream containing 10% Acetyl Hexapeptide-8, focusing on crow's feet area for 7 days.
- Reduction of wrinkles volume by 20,6%
- Reduction of wrinkles length by 15,9%

DIRECTIONS FOR USE:

Use once or twice a day in the AM and/or PM. Apply on the targeted area and allow product to absorb completely (approx. 5 minutes).

KEY INGREDIENTS

ACTION

56% Sodium Hyaluronate

- Instant filling & plumping effect
- Redensity & moisturize skin complexion
- Reduce fine lines & wrinkles
- Increase skin moisture & elasticity
- Long lasting hydration

33% Chondrus Crispus Extract

- Reverse the damaging effect
- Restructure & increase skin elasticity
- Increase glow & radiance for revitalized skin
- Protect from free radicals & UV radiation
- Stimulate collagen production

10% Acetyl Hexapeptide-8

- Reduce the degree of formed wrinkle & prevent the new wrinkle formation
- Increase cell proliferation by as much as 43% in 5 days
- Reduce wrinkles through muscle relaxation
- Reduce skin roughness in 28 days
- Visible result in 1 week

INGREDIENTS: AQUA, SODIUM HYALURONATE, CHONDRUS CRISPUS EXTRACT, ACETYL HEXAPEPTIDE-8, ETHYLHEXYLGLYCERIN, PHENOXYETHANOL

Ingredients Highlight:

1. Acetyl Hexapeptide-8

A unique, effective anti wrinkle peptide that was proven as first alternative to Botulinum Toxin.

Formation of expression wrinkles:

Wrinkles are caused by muscle contractions. Muscles get the signal to contract from the brain through nerves. But because the nerves do not reach right up to the muscles, since there is a small gap in between (synaptic gap), the signal cannot be transmitted to the muscles. In order for the signal to reach the muscles, the messenger substance Acetylcholine (ACh) is released as an aid (for bridging) and the muscles are contracted. The more neurotransmitters are released (Acetylcholine), the stronger the muscle contracts and deep wrinkles are formed. Argireline intervenes in a natural way in this system and reduces the release of Acetylcholine. The muscles relax and this in turn causes the wrinkles to gradually smooth and the formation of new wrinkles is prevented.

Acetyl Hexapeptide-8 is a natural peptide, whose muscle-relaxing effect and wrinkle reducing property has been confirmed in clinical trials. Clinical studies were performed with a maximum concentration of 10% Acetyl Hexapeptide-8. Zovil contains the highest recommended concentration of 10%. The recommended dose by the manufacturer are 2-10%

2. Sodium Hyaluronate

Sodium Hyaluronate belongs chemically to polysaccharides, multiple sugars. It is a natural substance that is produced by the skin itself. This is also the reason why sodium hyaluronate is well tolerated and quickly absorbed by the skin. Sodium Hyaluronate is present in young skin in large quantities. With age, the natural content in the body is reduced or destroyed. This can occur by the natural aging process or by constant environmental influences to which the skin is exposed. The skin loses its elasticity and deep wrinkles develop. The role of Sodium Hyaluronate is to support collagen fibers and structural proteins and bind moisture. Because of its ability to store large amounts of water, by its nature, Sodium Hyaluronate absorbing more than 1000 times its weight, gives the skin volume and a youthful appearance. This in turn causes a padded effect. The wrinkles are filled from within – a lifting effect is caused, the skin becomes elastic and looks plump. Since many years, Sodium Hyaluronate will be applied with success in wrinkle treatments by injection and are an indispensable ingredient in today's cosmetic researches. Zovil contains a high concentration of Sodium Hyaluronate.

3. Chondrus Crispus Extract

Chondrus Crispus Extract have an ever higher status in cosmetics because of their high level of minerals, trace elements, vitamins (especially rich in B vitamins A, C and E) and proteins. These feed the skin with all the necessary nutrients and promote the natural regeneration process of the skin. This in turn is important for firm skin, a radiant complexion and the smoothing of wrinkles. Due to a lack of nutrients, the cells also suffer from lack of energy which among other things can be visible on the skin. Chondrus Crispus Extract protect the skin from the damaging effects of free radicals and give it a natural UV protection. Due to the high proportion of amino acids, the formation of collagen is stimulated, the skin regains its elasticity and firmness. It is an important ingredient against premature wrinkles and age spots, and on top of that it is very friendly to the skin because it has no allergy-causing substances. Chondrus Crispus Extracts are essential for high-quality facial care.
